

# TreeLight

*Low Voltage miniature Festoon Lighting*

**Long Life - 20,000 Hours    Low Power - 0.96w per Lamp**

**TreeLight** comprises of miniature *Low Voltage* lamps housed in sealed weather proof holders and covered by clear polycarbonate lenses. The lamp holders are wired in parallel using a twin 'figure of 8' PVC insulated cable.

Ideally suited to silhouette the branches of deciduous trees in winter or to provide a twinkling cover on the surface of evergreens. Because of its inherent reliability it can also be used to highlight buildings and other permanent structures such as bridges etc.

## Specifications :

Light source :	Miniature Low Voltage Filament Lamps
Housing :	Weather Proof lamp holder / Polycarbonate Lens Cover
Power consumption :	0.96 watts per Lamp
Rated Life :	20,000 hours
Rated Voltage :	24 volts
Power supply :	240/24v IP65 Transformer - Rating to suit application.
Lamp Pitch :	200mm (Standard)
Harness Length :	30m - 140 lamps @ 200mm with 2m 'tail'
