PowerLED

Solid State Replacement for **240v B22 / E27** filament lamps

Incorporating High Power LEDs

Long Life - Low Power - High Brightness

LED replacement for 240v 'GLS' or 'Golf Ball' Lamps

The PowerLED unit incorporates purpose designed high output LEDs and advanced miniaturised electronic transformers. These combine the lifetime & reliability of solid state devices with brightness approaching conventional lighting. Uniquely packaged for use with B22 or E27 fittings it is, in many applications, a real alternative to incandescent lighting with the benefit of **ultra long life** and **very low power (0.6watts per lamp)**

Specifications :

Light source :	High Power LEDs
Cap fitting :	Ba22d (BC) or E27 (ES)
Colour range :	White, Red, Blue, Green, Amber
Rated Voltage :	240volts 50hz (mains)
Power consumption :	0.6 w each
Rated Life :	50,000 - 100,000 hours
Lens Cover :	Clear Polycarbonate - 4 Designs
